A black and white photograph of the Campanile at the University of California, Berkeley. The tall, light-colored stone tower features a clock on its left side and a decorative spire at the top. It is surrounded by several tall evergreen trees. The sky is bright and overexposed.

# **Using space-based observations to understand urban emissions and chemistry**

# BEACO<sub>2</sub>N

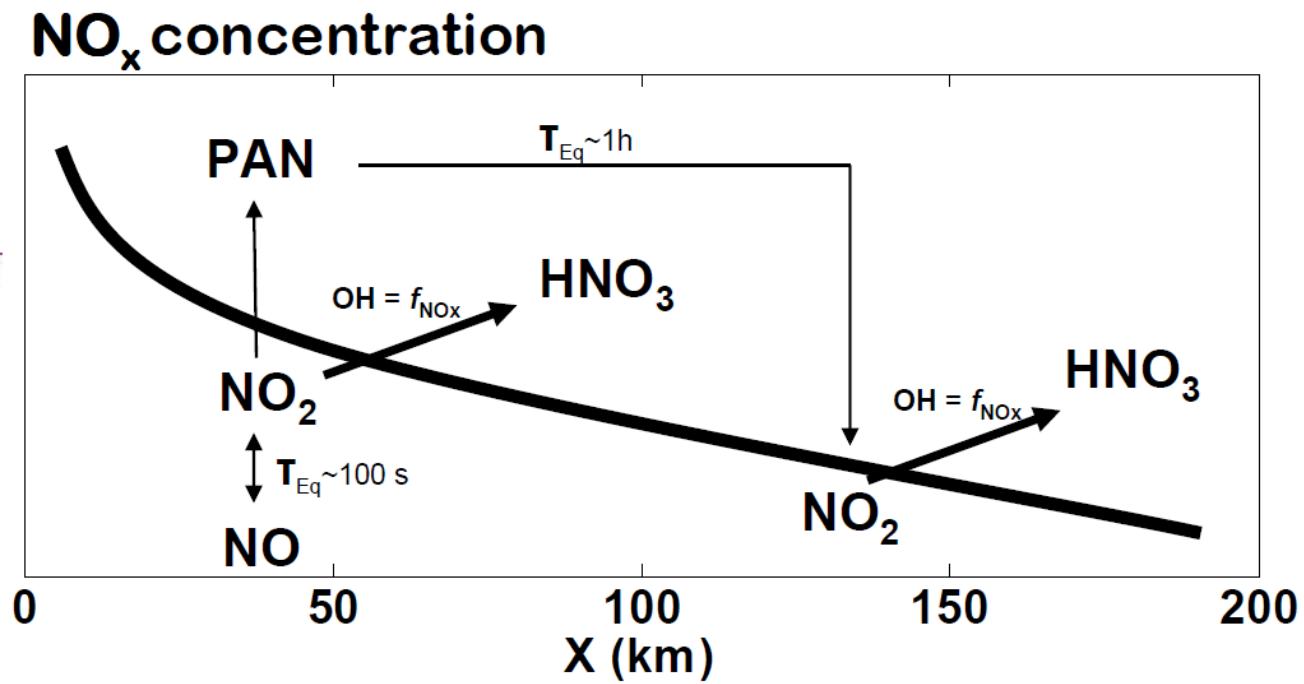

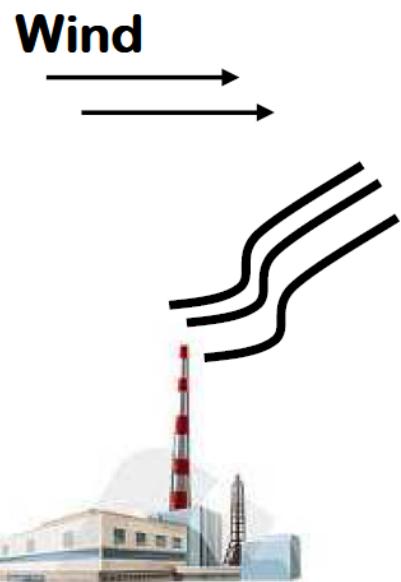

The BERkeley Atmospheric CO<sub>2</sub> Observation Network

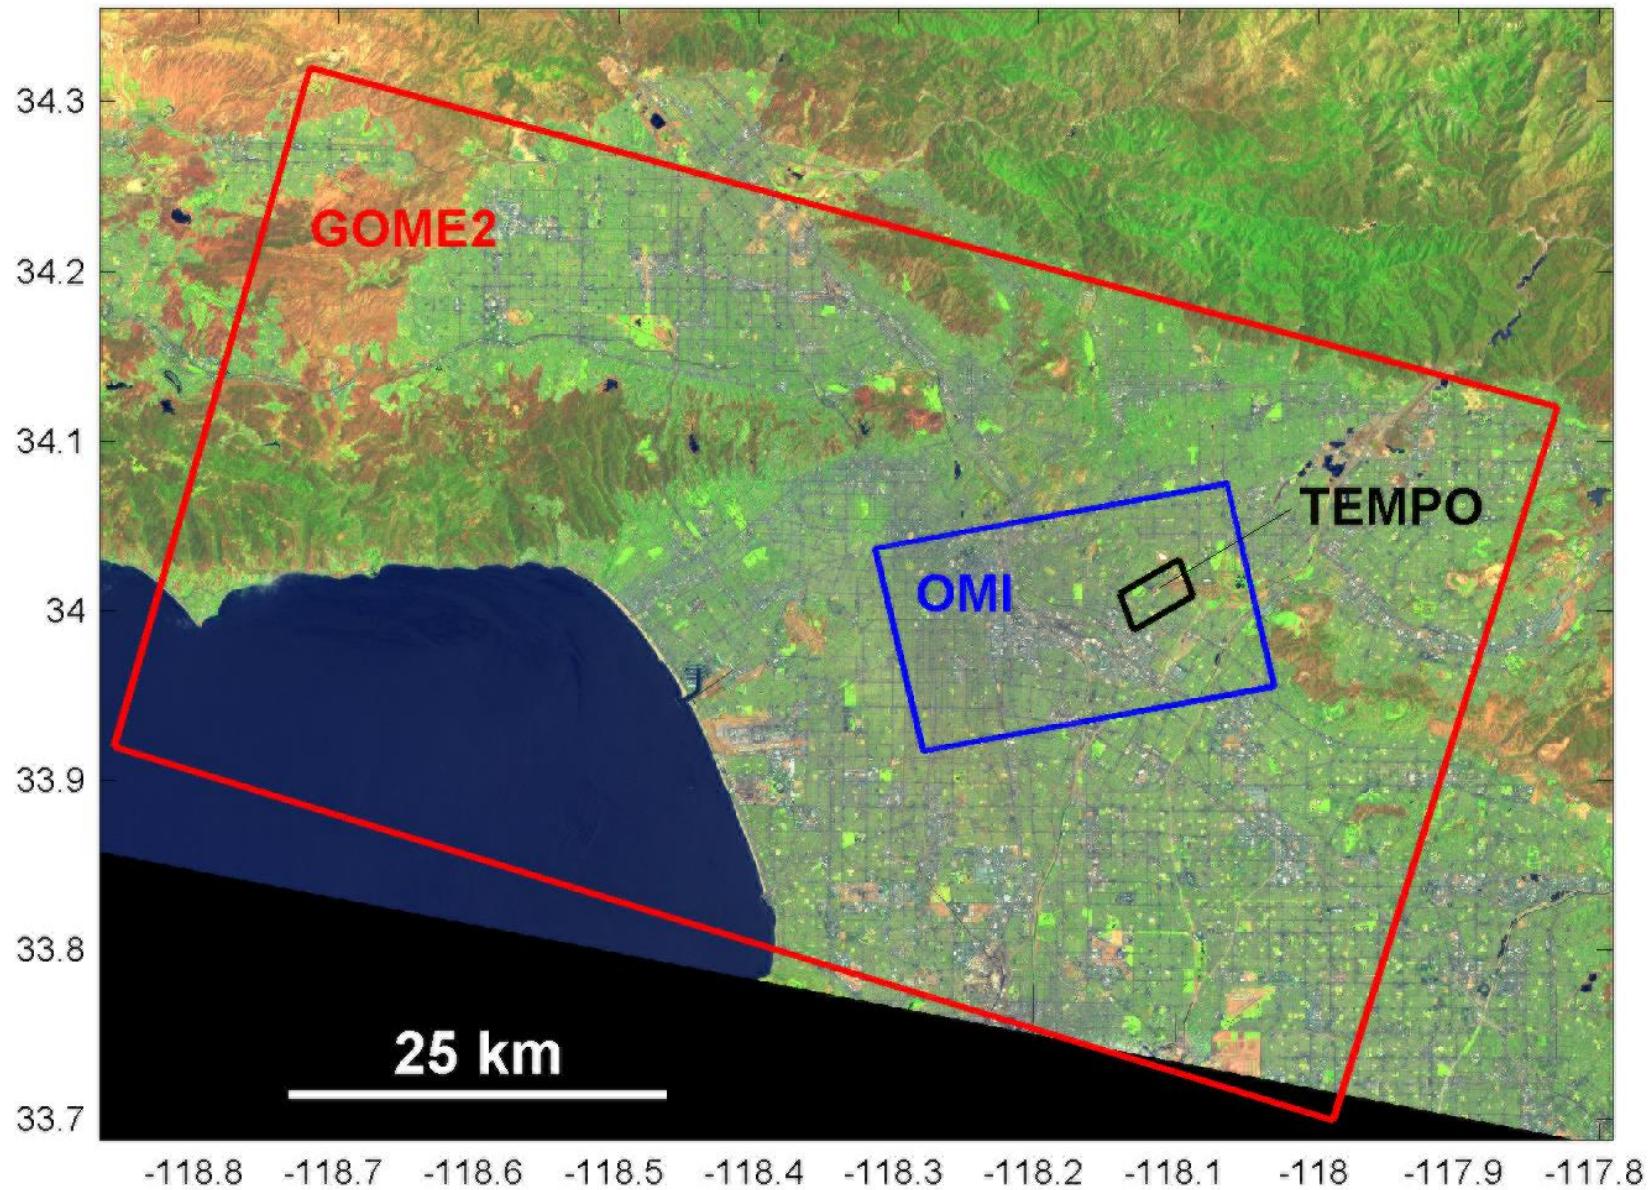

Sensor array for CO<sub>2</sub>, NO<sub>2</sub>, O<sub>3</sub>, ...

Nodes deployed on school rooftops

**<http://beacon.berkeley.edu/>**

## Instrument Footprint over Northwest Los Angeles

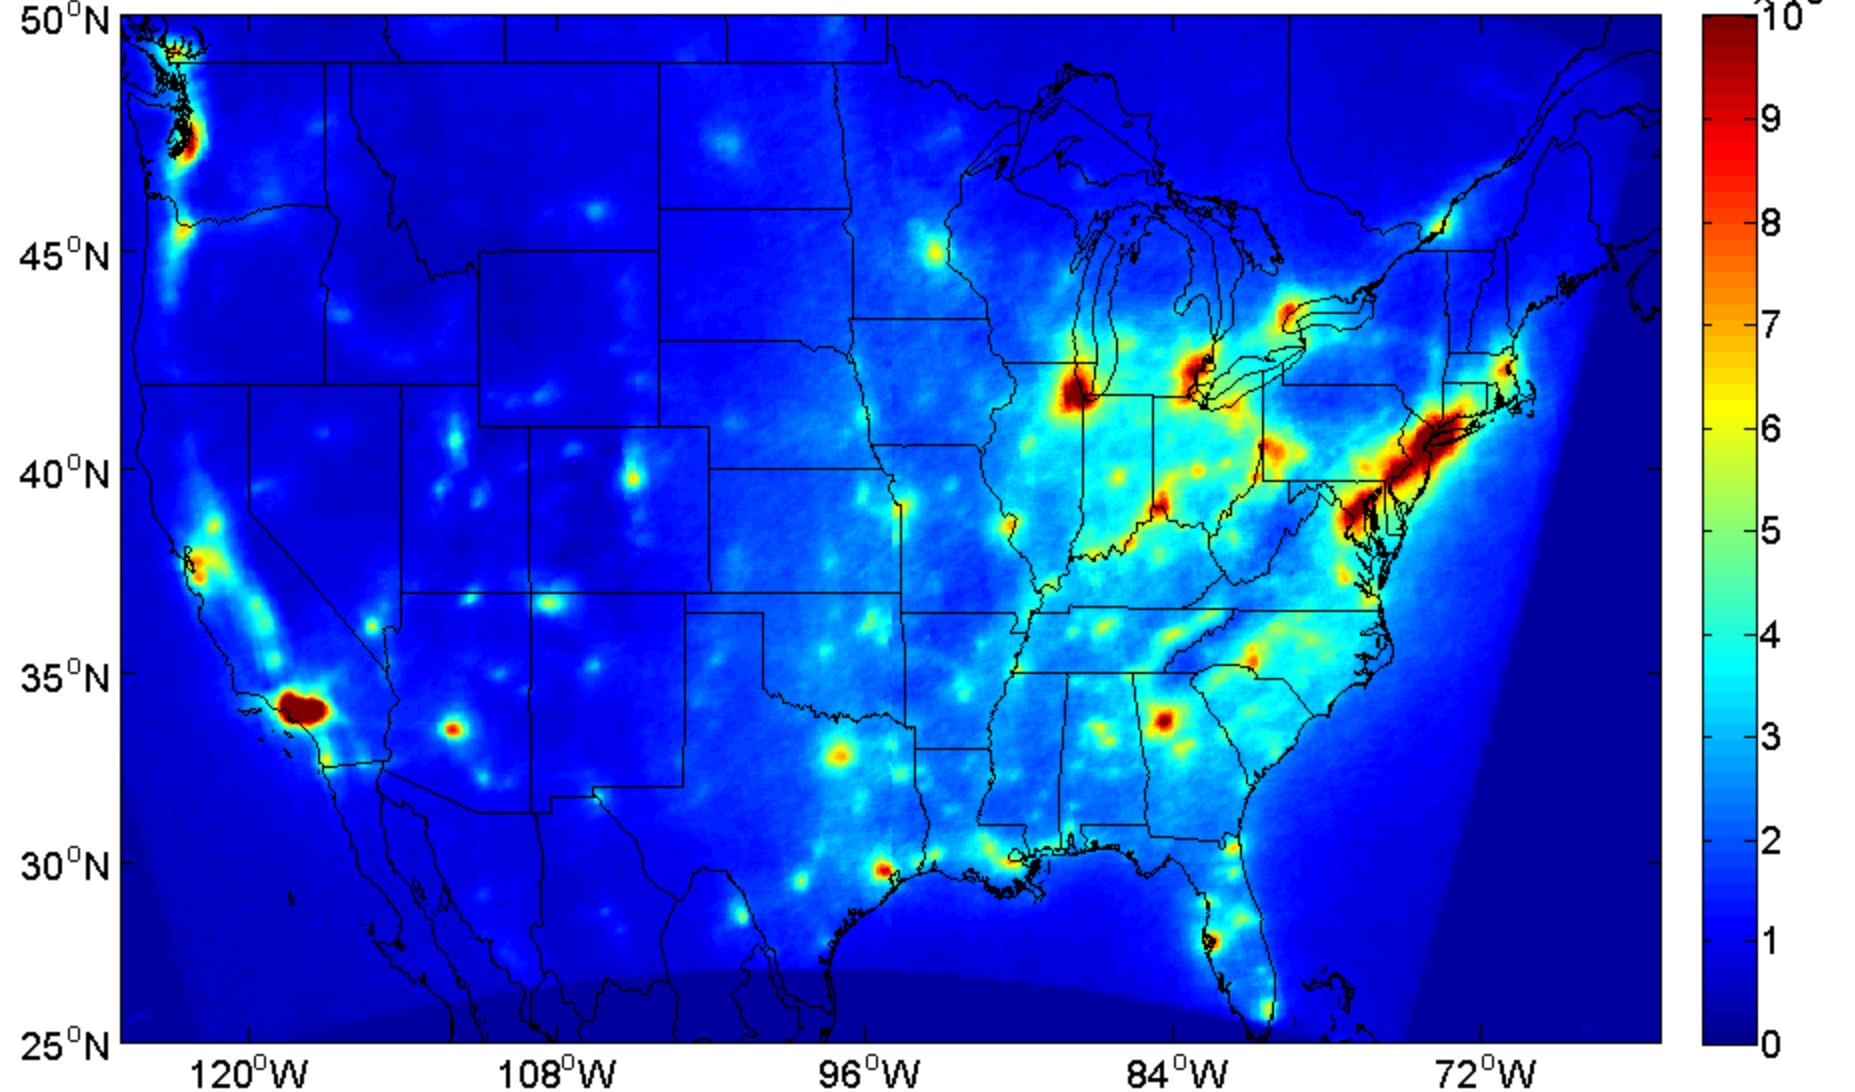

**1. We need a retrieval  
that is accurate at  
spatial scales of ~10 km**

# Berkeley High Resolution Retrieval (BEHR)

	<b>NASA standard</b>	<b>BEHR</b>
<b>Terrain pressure</b>	High-res terrain database, <b>center</b> of OMI footprint	High-res terrain database, <b>average</b> over OMI footprint
<b>Terrain reflectivity</b>	Monthly $1^\circ \times 1^\circ$	MODIS, 8 day $0.05^\circ \times 0.05^\circ$
<b>NO<sub>2</sub> profile shape</b>	Annually $2^\circ \times 2.5^\circ$	WRF-Chem, Monthly $4 \times 4 \text{ km}^2$ (CA&NV) $12 \times 12 \text{ km}^2$ U.S.
<b>Clouds</b>	OMI cloud product	MODIS cloud product

## **2. Resolving chemistry and emissions from space**

# OH is nonlinear with NO<sub>2</sub>

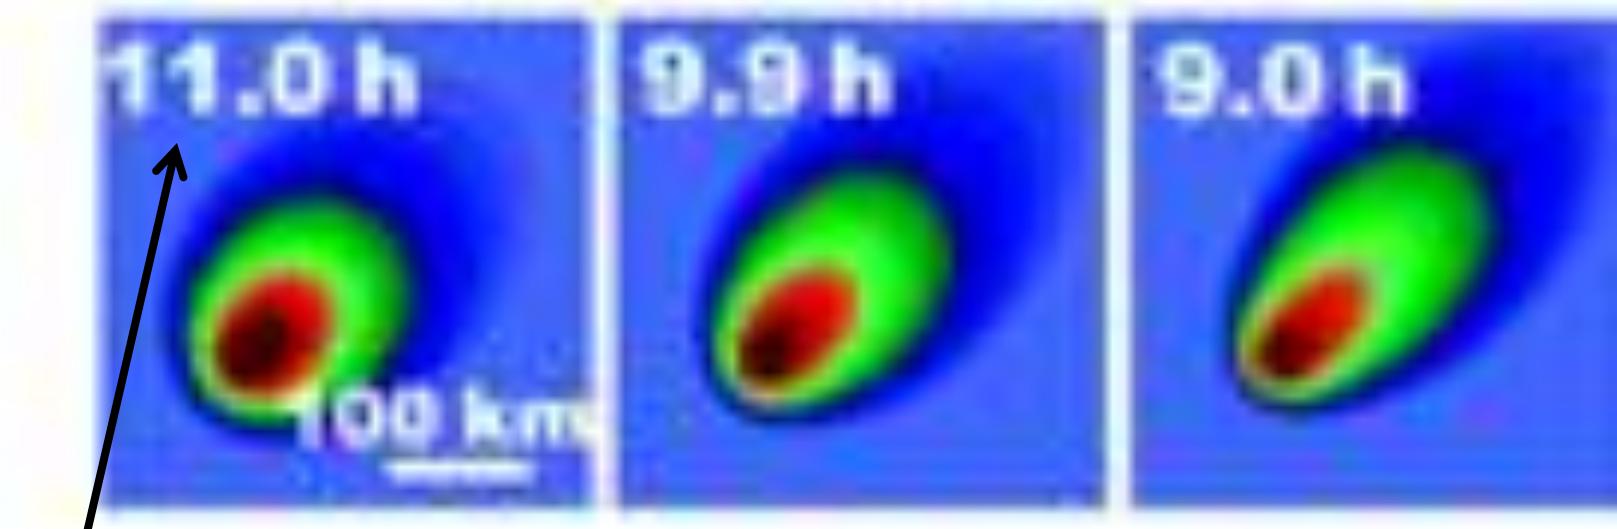

# 2-d (or 3-d WRF)

- **constant emissions**
- **advection**
- **dilution**
- **chemical feedback.**

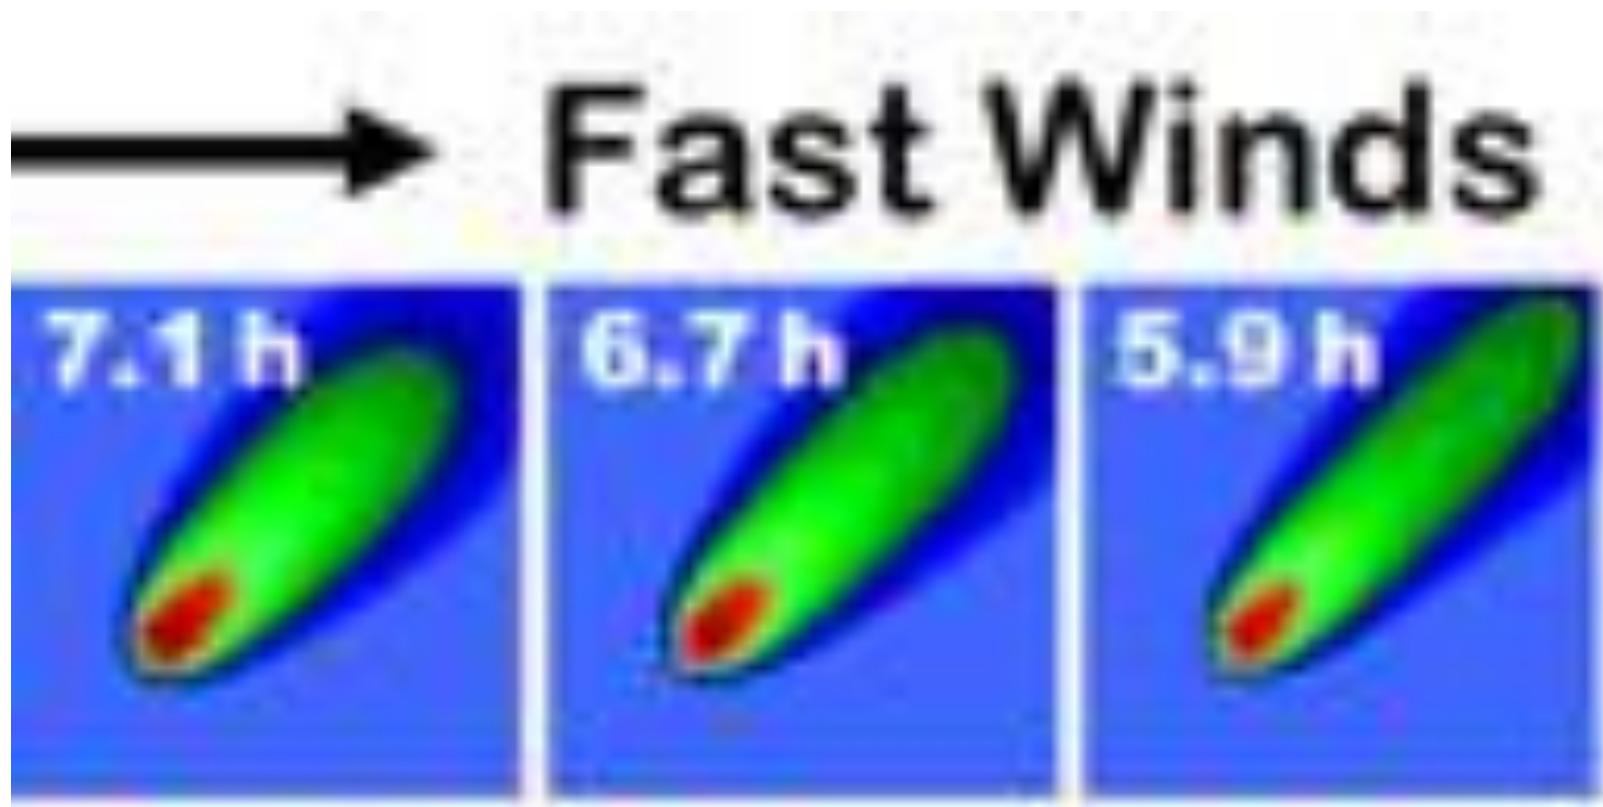

# Prediction: lifetime of NO<sub>x</sub> depends on wind speed

Slow winds →

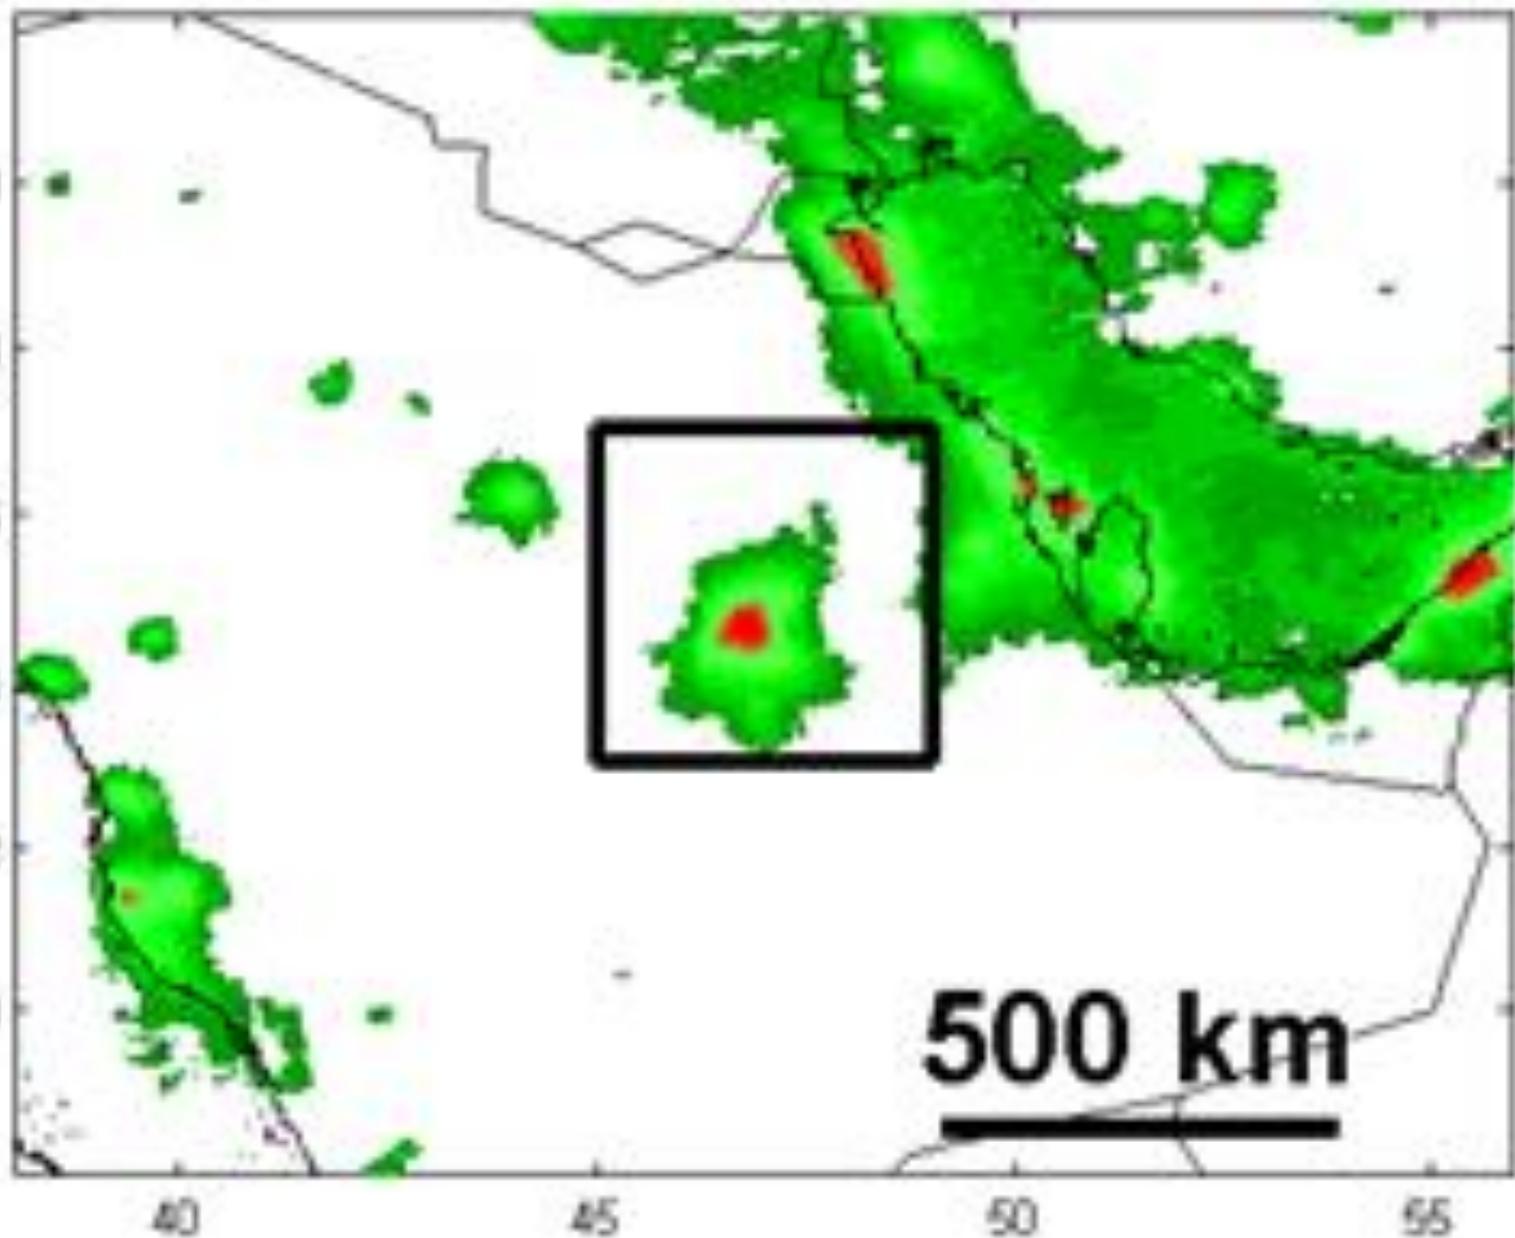

Lifetime

**Prediction: lifetime of NO<sub>x</sub> depends on wind speed.**

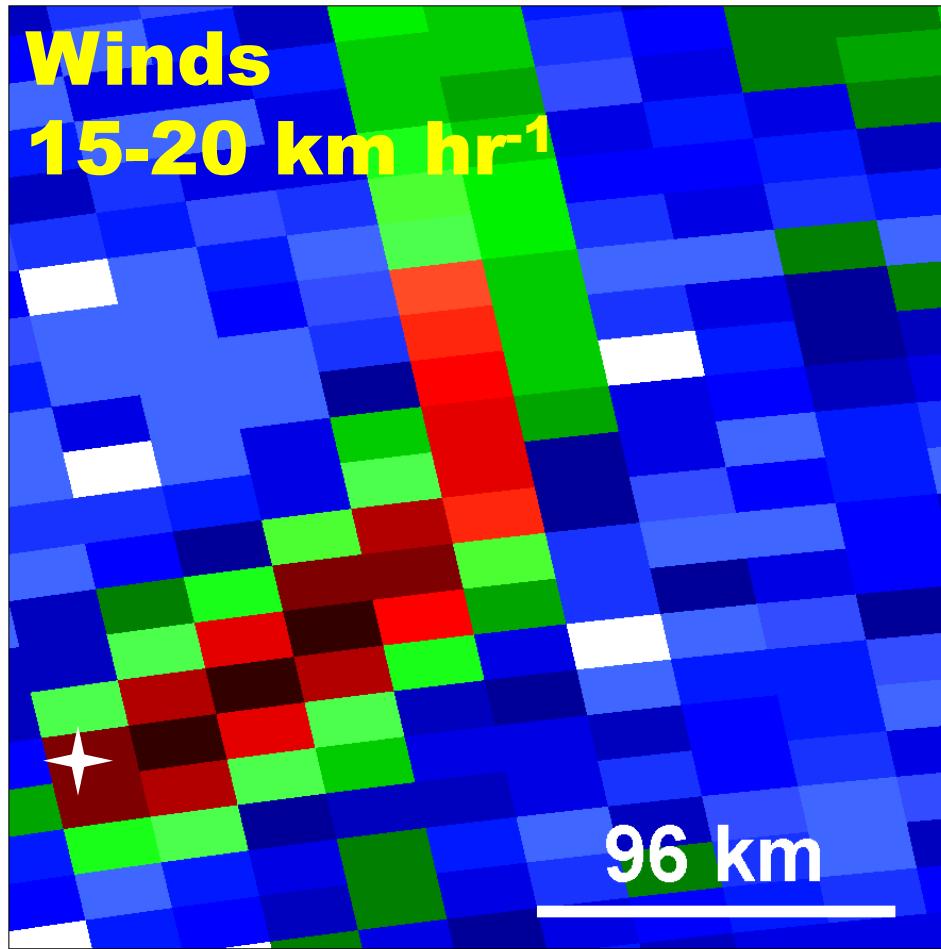

# Riyadh

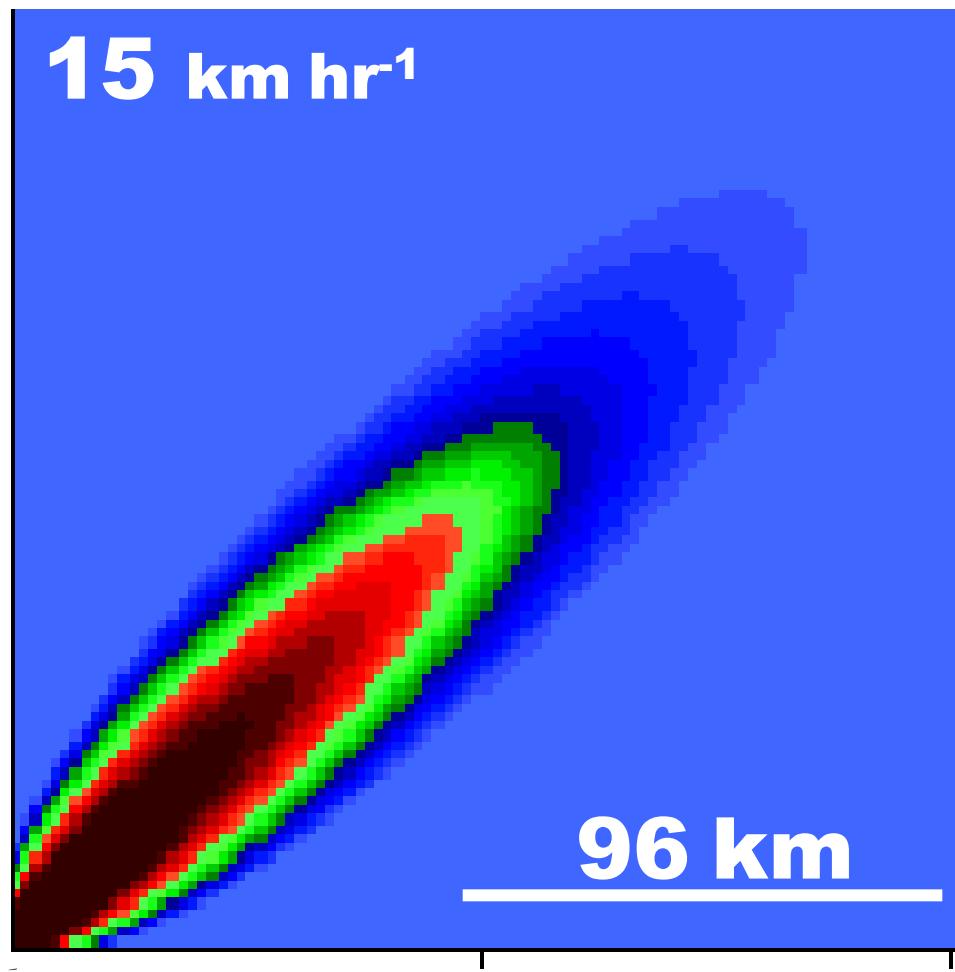

# Riyadh urban plume (OMI)

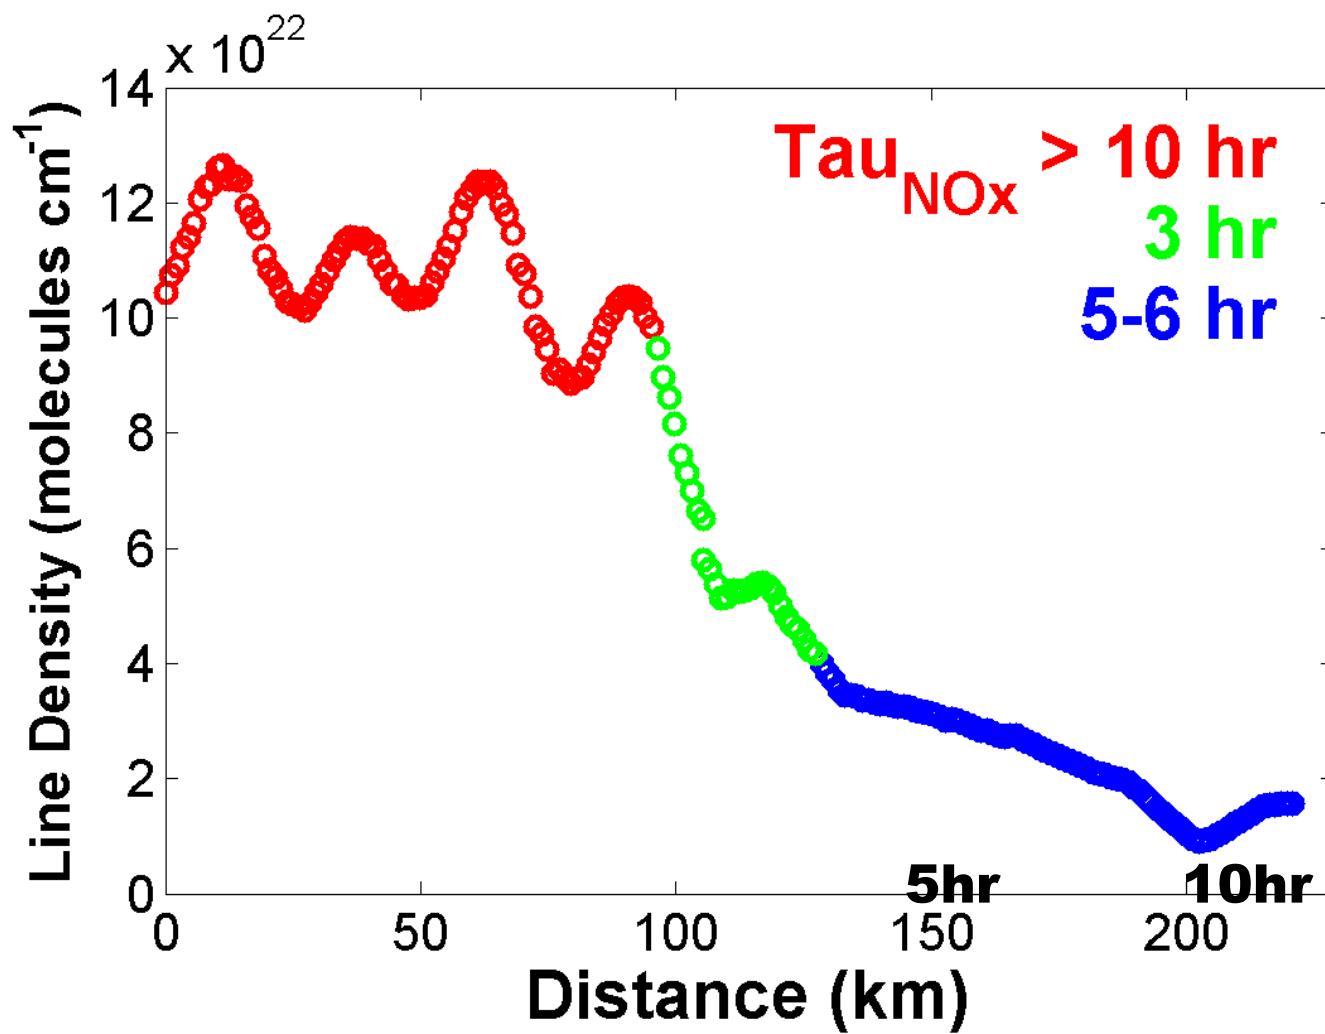

Riyadh

L Valin et al., GRL 2013

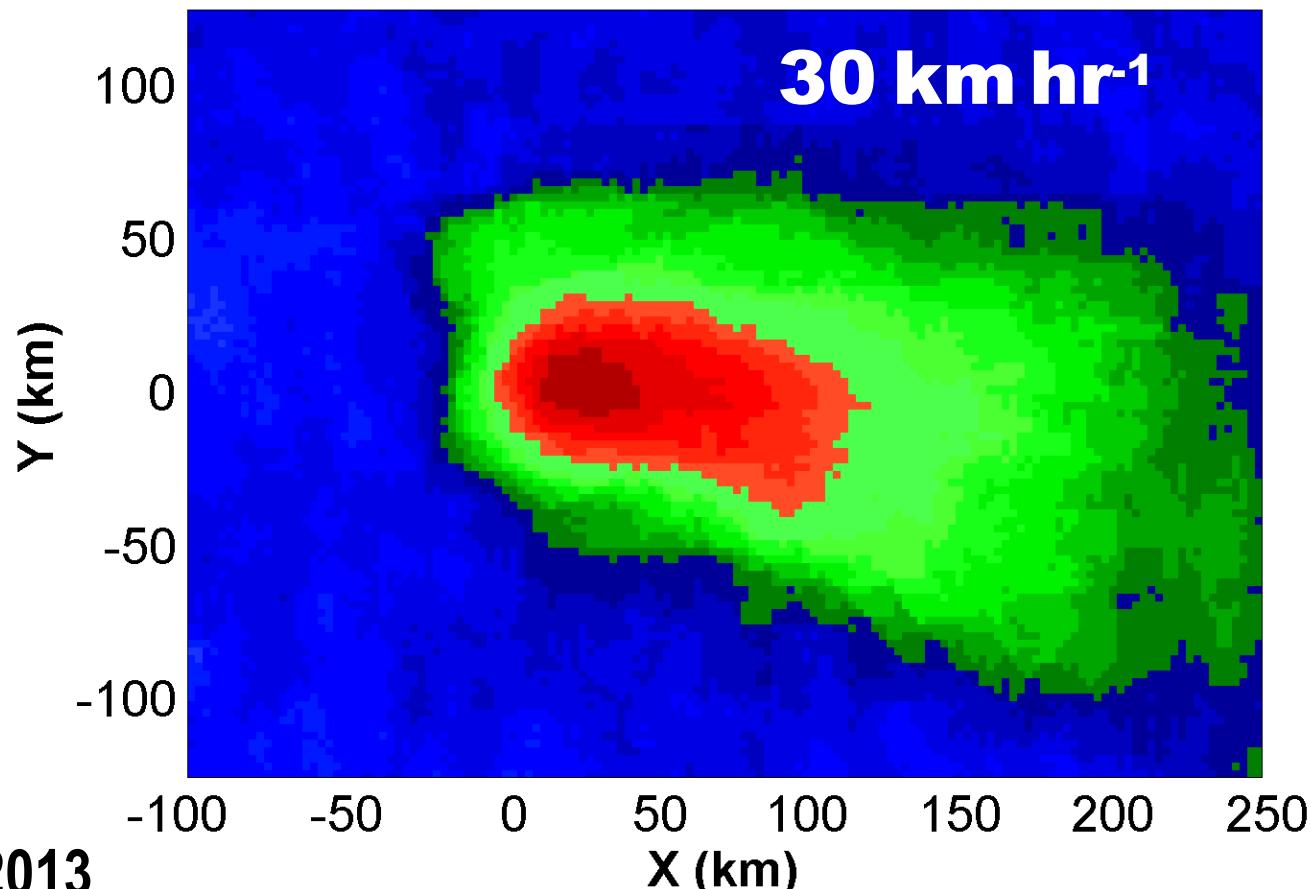

# A model plume

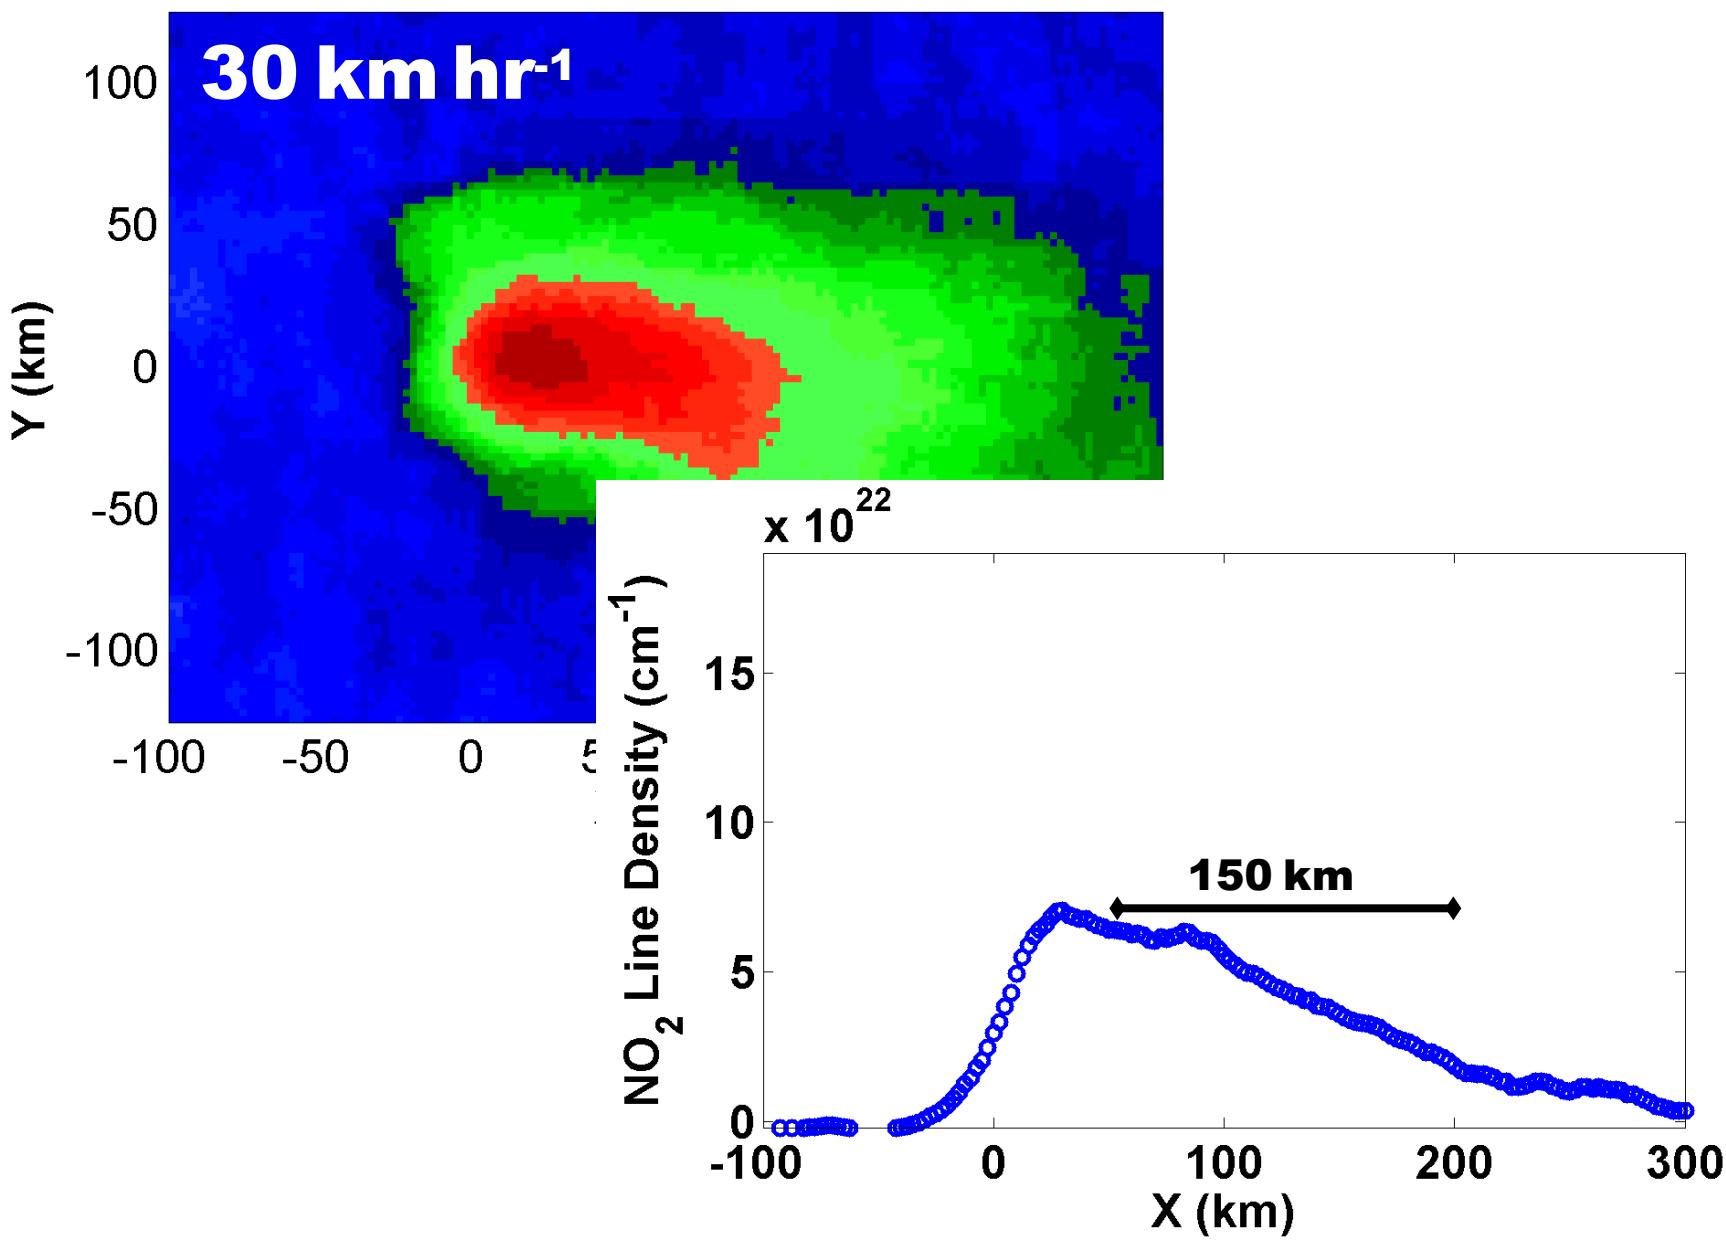

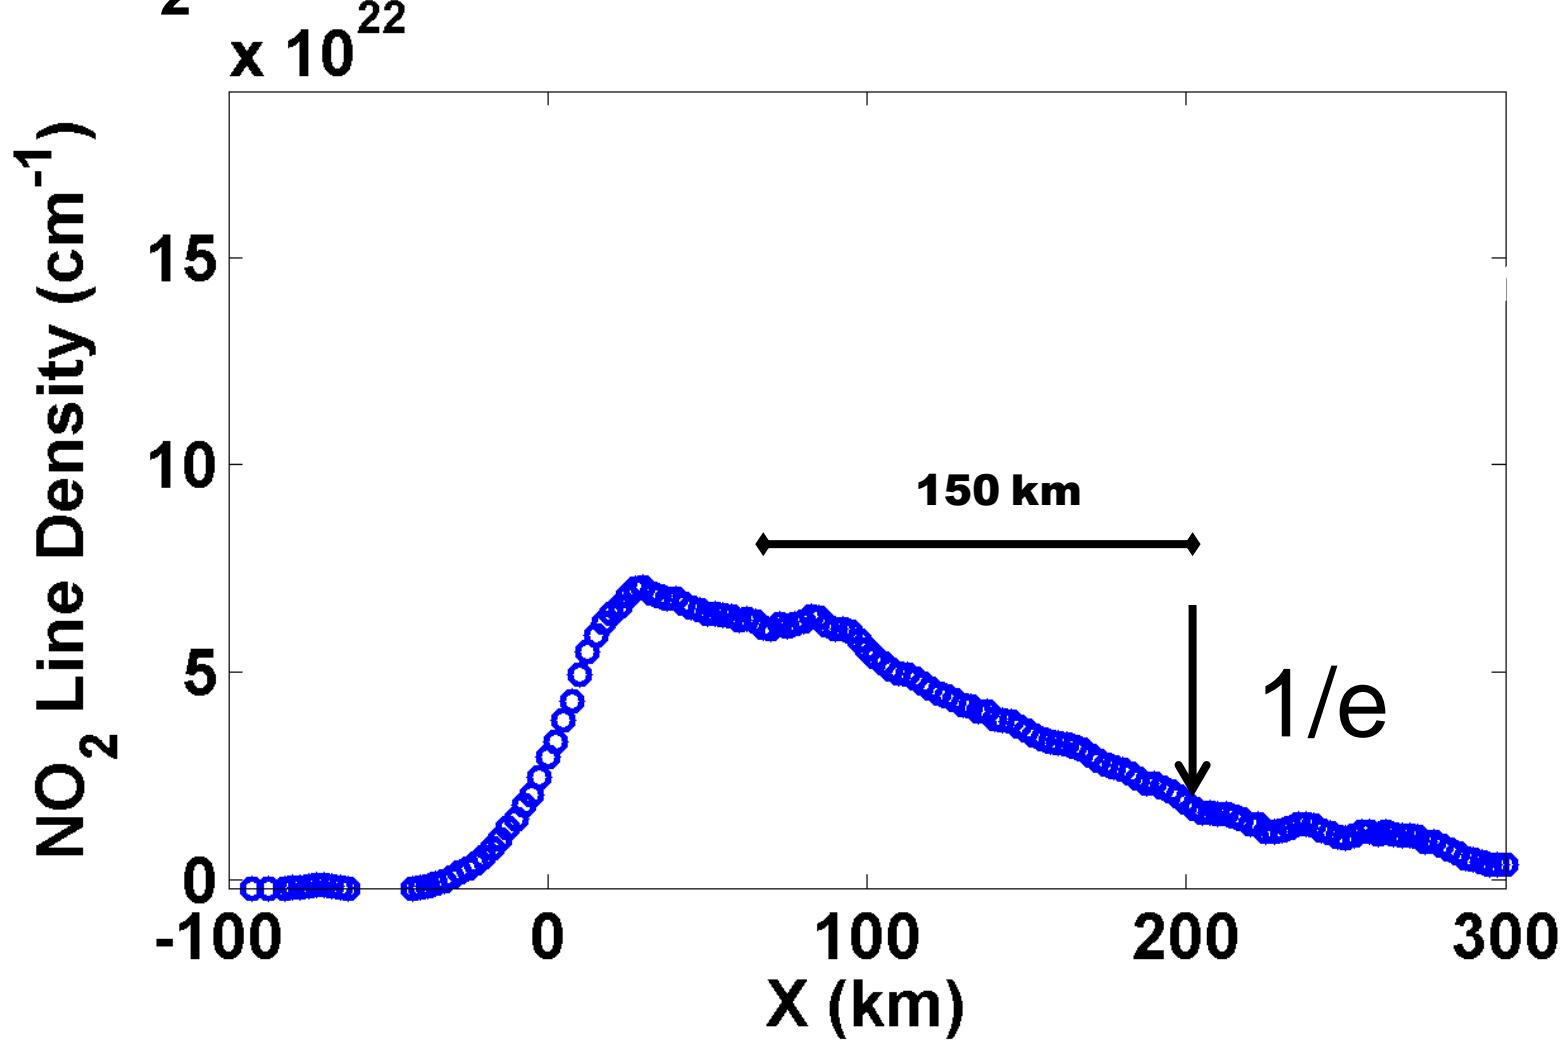

**Rotate winds to x direction**  
**(see also Beirle et al. Science, 2011)**

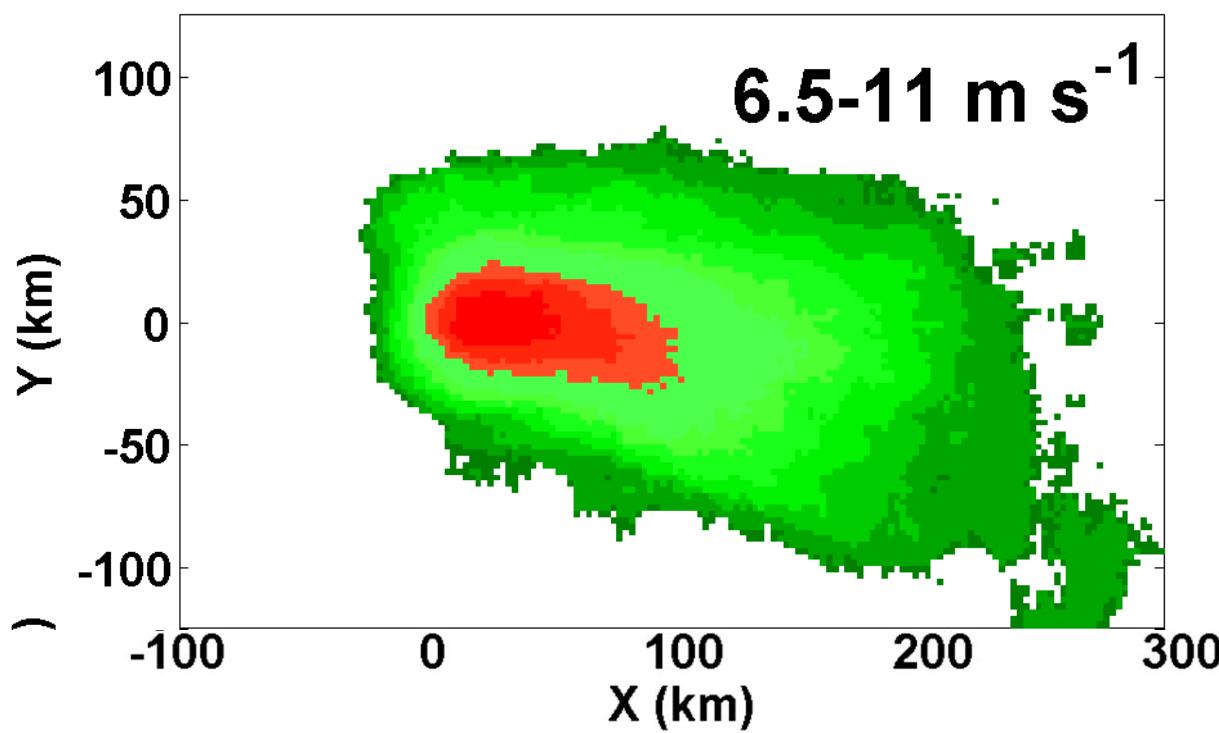

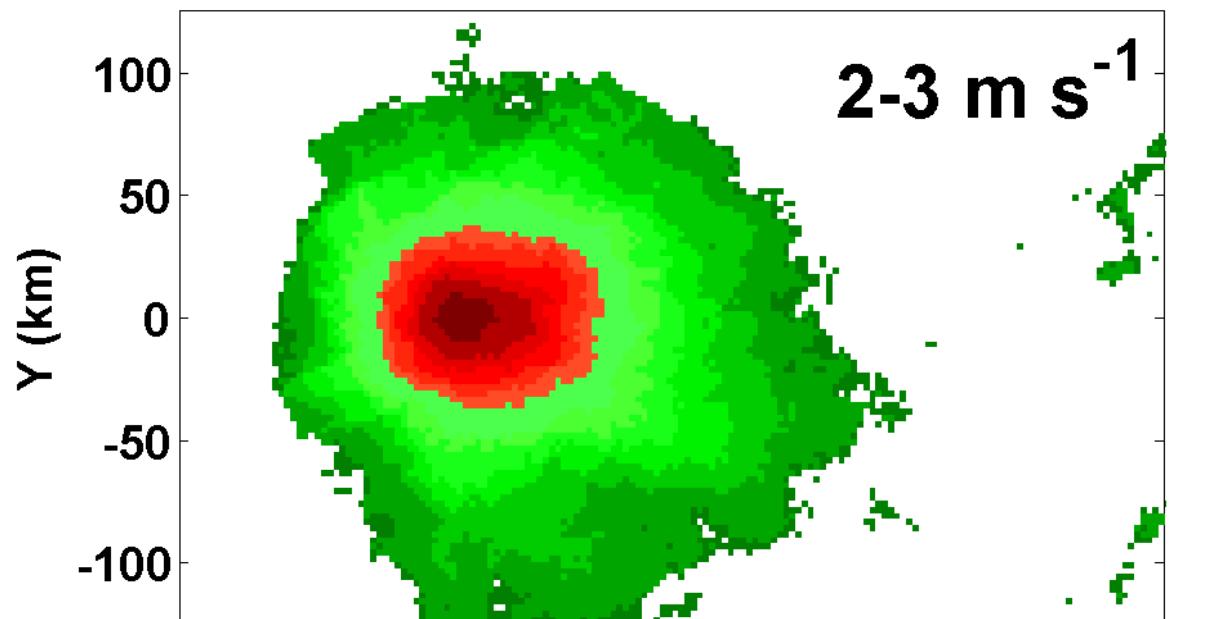

**Sort by wind speed**

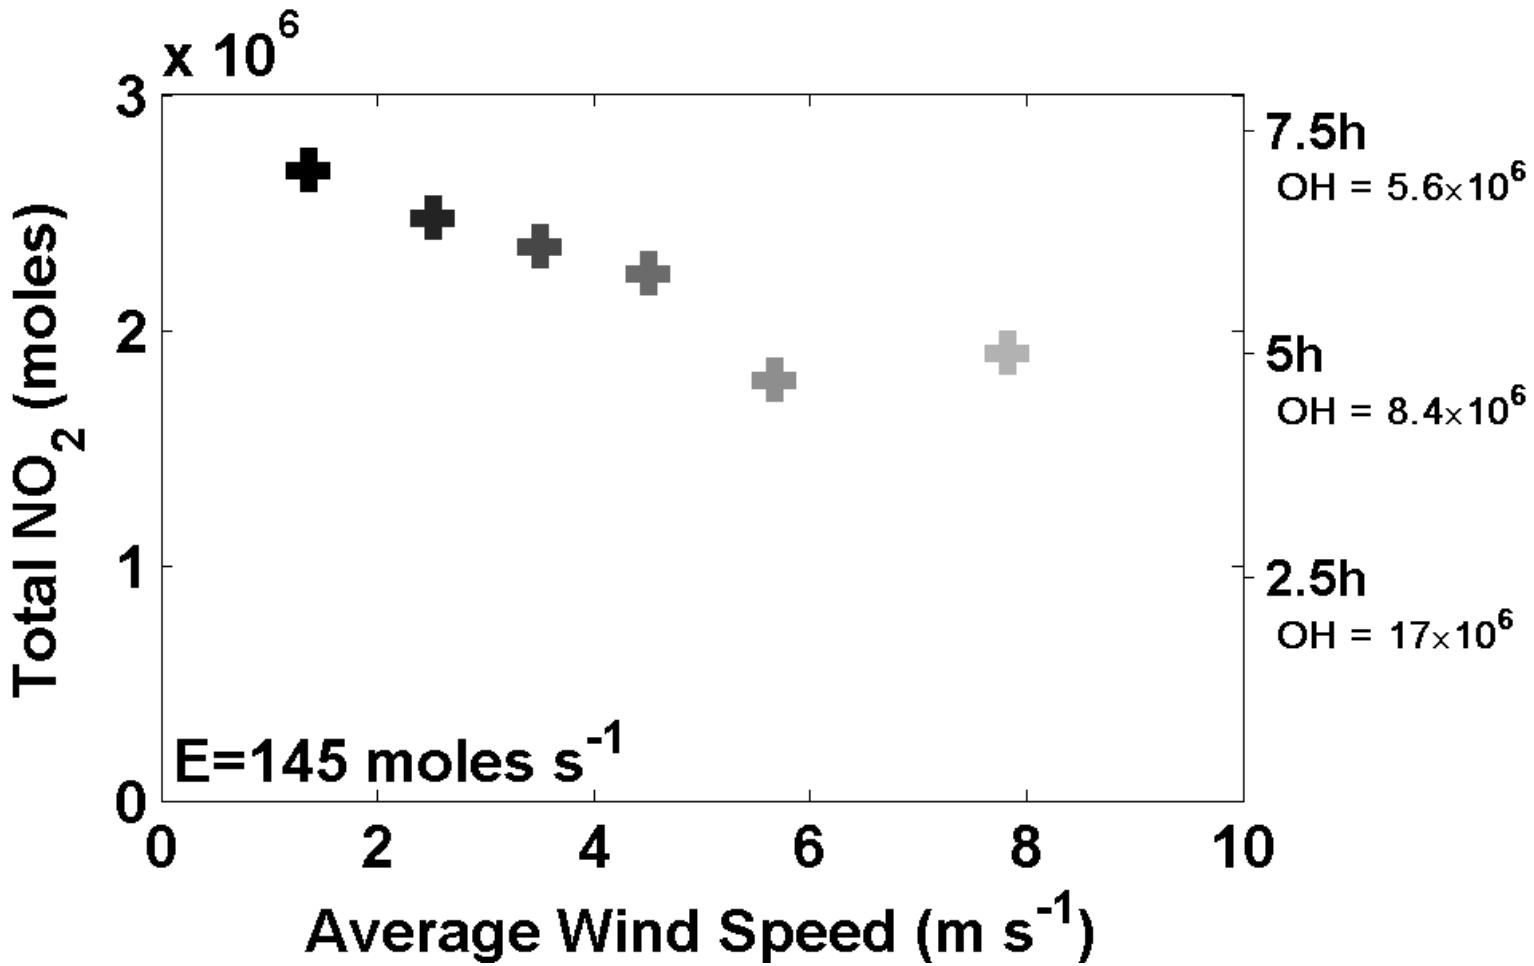

# The $\text{NO}_2$ lifetime

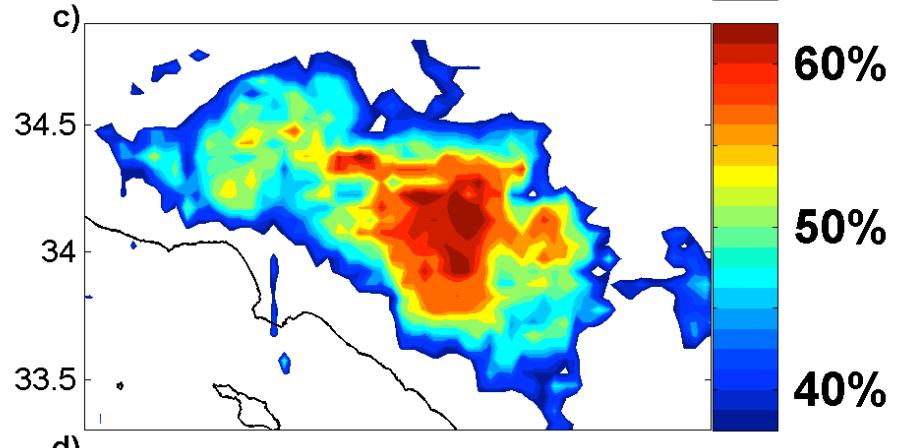

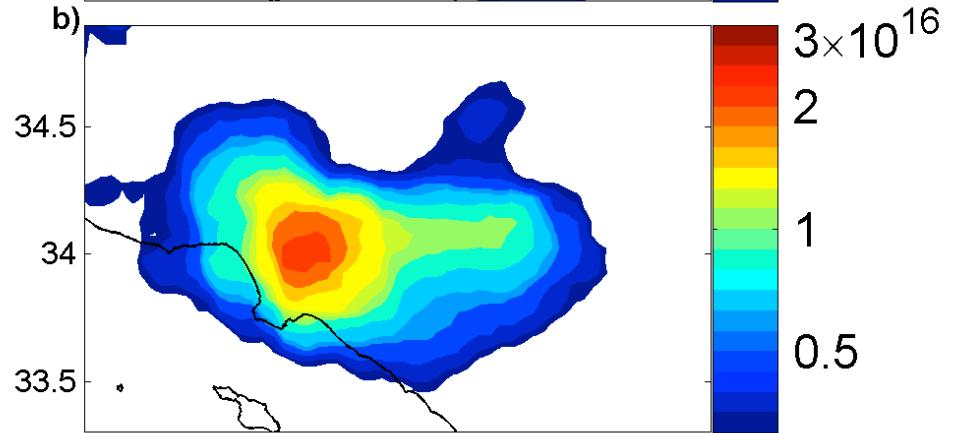

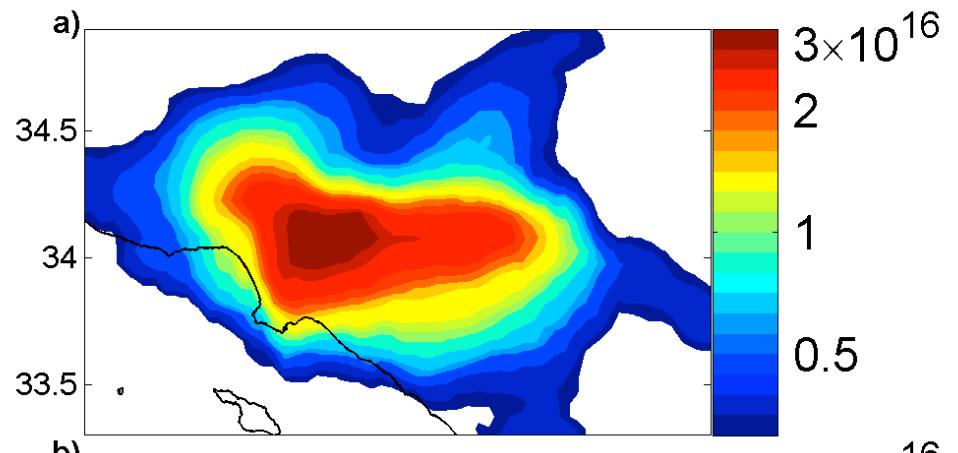

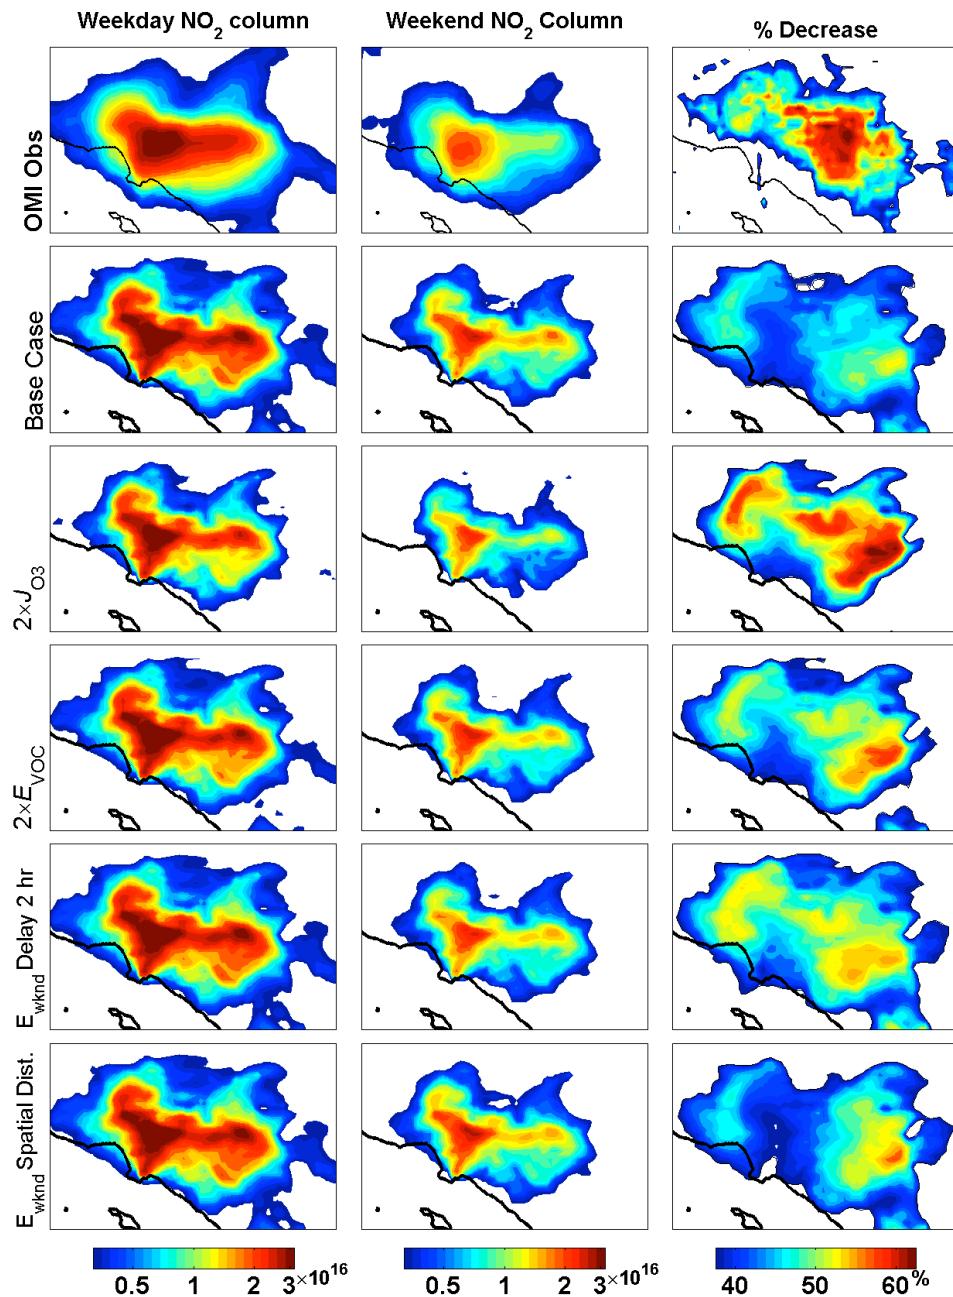

# Integral of the entire plume

## NO<sub>x</sub> lifetime and OH<sub>effective</sub>

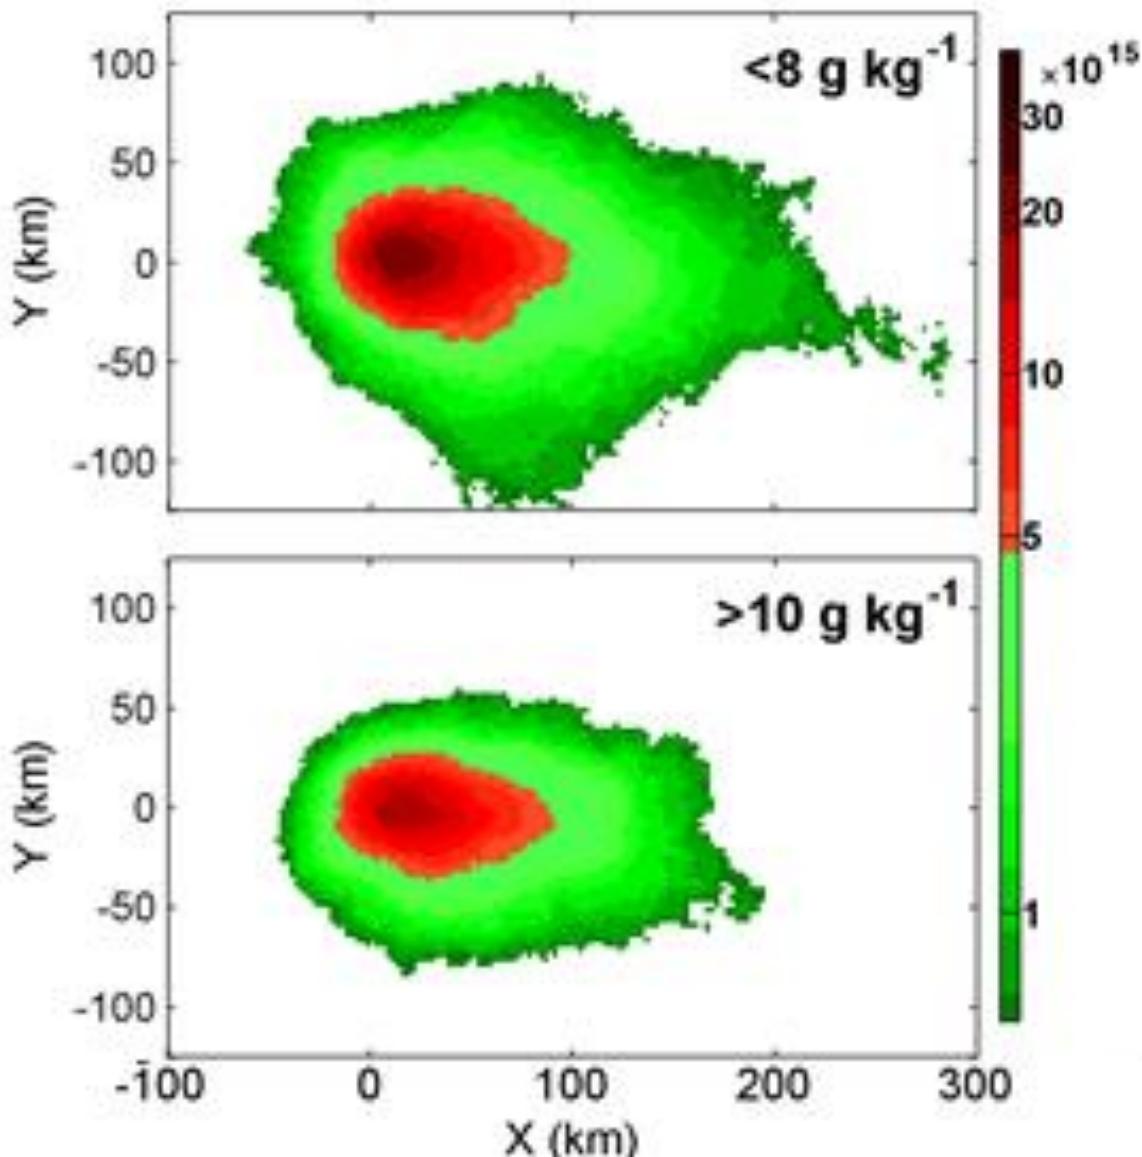

d)

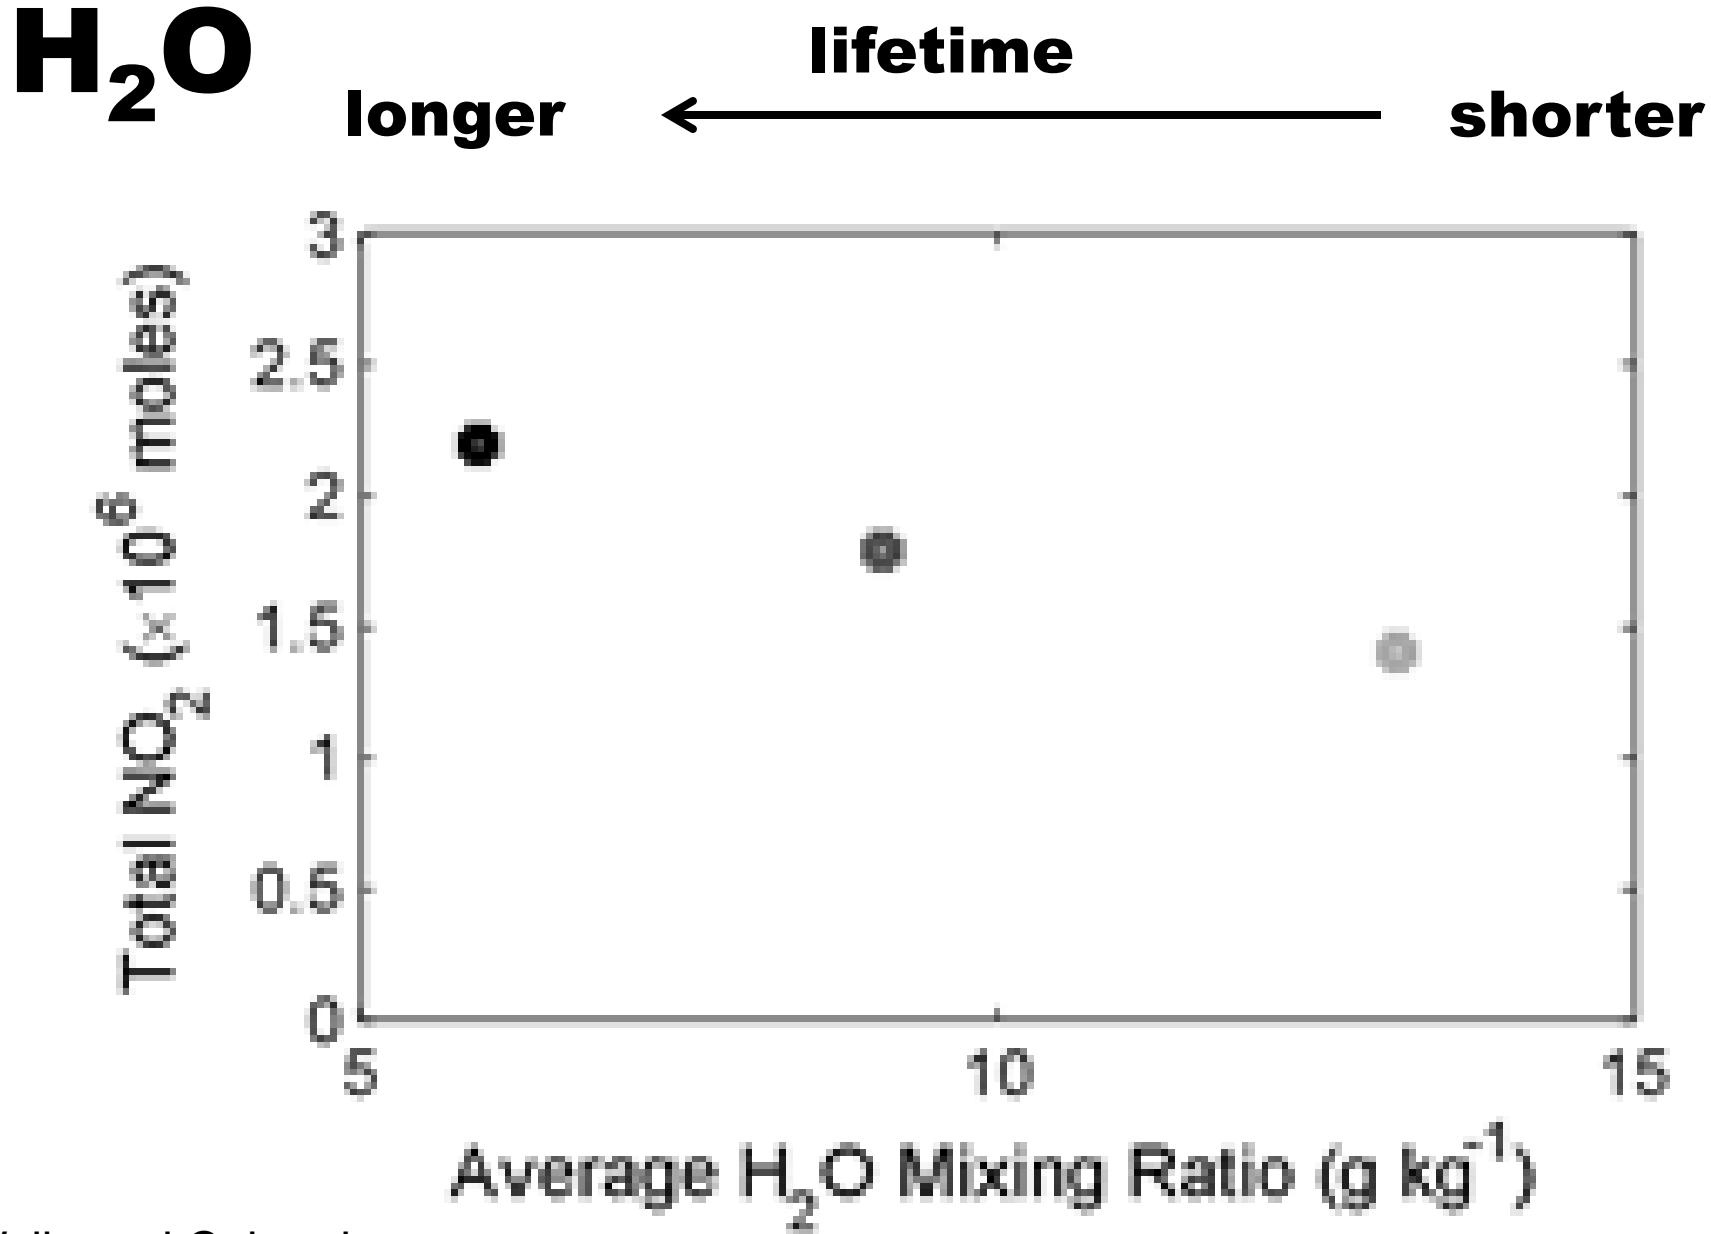

**The same ideas hold true  
for variations in H<sub>2</sub>O—the  
source of the OH**

# Riyadh

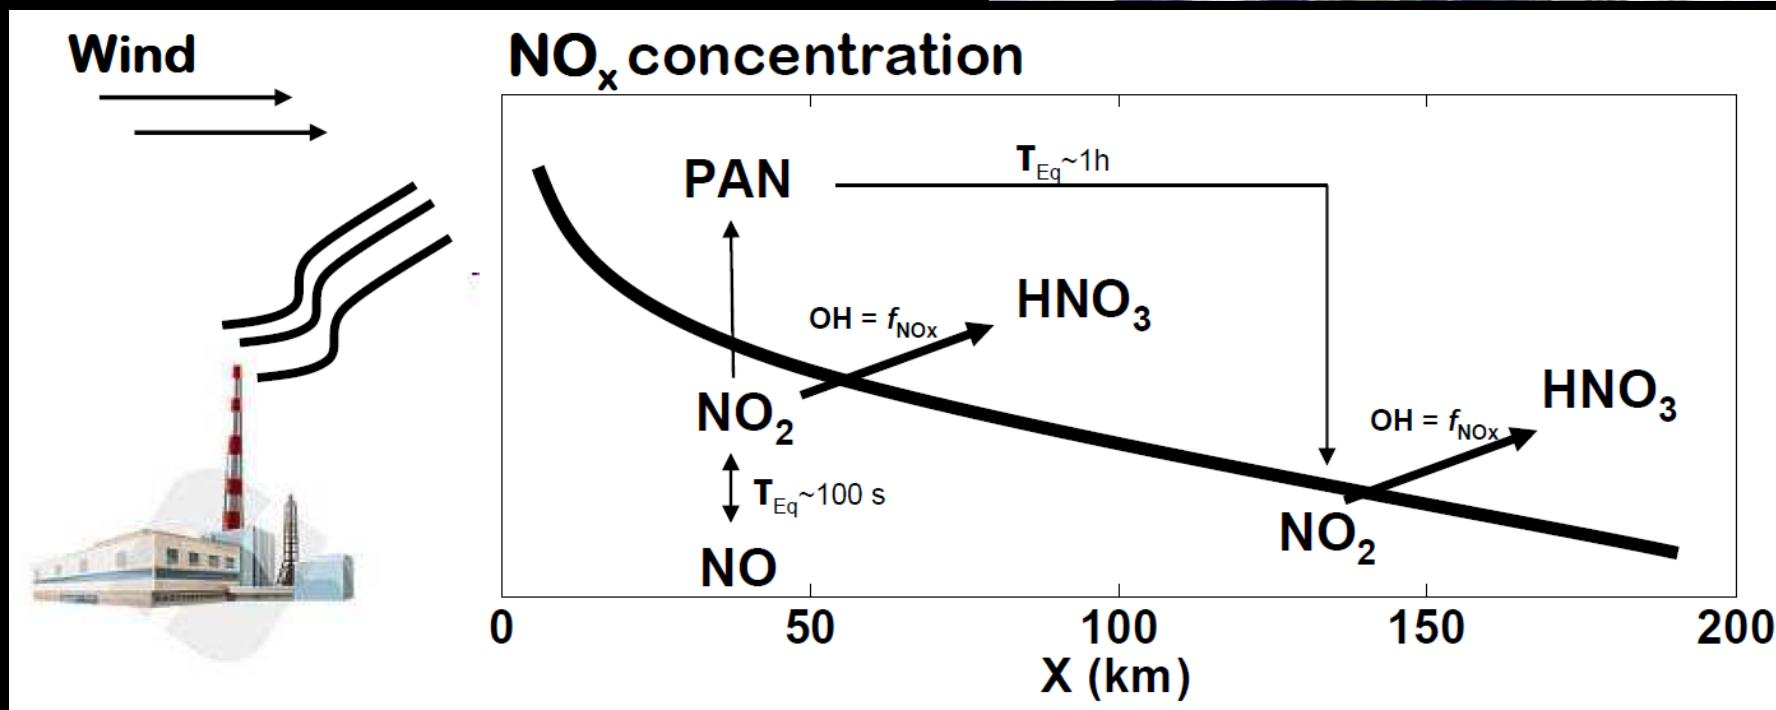

**Low water,  
less OH,  
more  $\text{NO}_2$**

**High water,  
more OH,  
less  $\text{NO}_2$**

# Conclusions:

**TEMPO, GEOSCAPE,  
TROPOMI, ...**

# Thank you
